

The Program

The Early Intervention Service caters for children from four years to school entry age with a confirmed disability. The service is implemented the year prior to starting school.

Children with autism, a physical, intellectual or sensory disability or an emotional disturbance may be supported through the Early Intervention program.

The Service

An individualised learning program is designed for each child in collaboration with the parents, therapists and Early Childhood teachers to plan for a successful transition to school.

The two program options are:

Early Intervention Support Class Program

Classes run for 2.5 hours with each child attending a small group morning or afternoon session two or three times per week.

Early Intervention Resource Program

A collaborative approach where the Early Intervention teacher works with the child and staff at the child's preschool or childcare centre on a negotiated basis.

Referrals

Referrals may be made by:

- the child's parent or carer
- other professionals, with parent or carer permission
- your local public school

Itinerant Support Teacher - Early Intervention

Works with the family, staff and other services to:

- support the Access Request application process for Early Intervention
- assist in planning a smooth transition to school for the child

For additional information, please contact your local Department of Education Office and ask for the Learning and Wellbeing Officer or Support Teacher Early Intervention.
